PROJECTS

Amazon Price Watch

AntonKanug/Price-Watch | Sep 2019 - Present

An application that tracks the prices of items from Amazon.com. Planning to deploy the frontend as a web application using HTML5, CSS3, JavaScript, ReactJS & Flask. Built using Python, Requests, BeautifulSoup4 & Git.

DevKit

DevKit.com | Aug 2019 – Sep 2019

A web application that allows developers to find software tools. The application also allows the users to request a tool to be added to the database which can be reviewed by admins to add it. Built using HTML5, CSS3, JavaScript, ReactJS, Express, Git & Firebase.

Personal Website

antonkanug.com | Apr 2019 - Present

My personal website about myself, my interests and my future projects. Built using HTML5, CSS3, JavaScript, Bootstrap4, Git & Adobe XD.

SumoBot Competition (Team Leader)

AntonKanug/SumoBot | Jan – Apr 2019

A team competition to build a SumoBot to battle other teams at the end of the period. Our SumoBot was built using Arduino and 3D modelling and printing. Placed top 16/60.

VOLUNTEER EXPERIENCE

Teaching Assistant

DPCDSB, St Josephine Bakhita Elementary School | Brampton, ON, CA | Sep 2017 – Mar 2018

Taught and assisted students with their academics and other skills or needs. Assisted the teacher with managing the class and preparing for the next day's lessons.
